| Date:          | November 14,2025                                                                                                          |
| Participants:  | . Nathan Kwenda<br>. Favour Gabriel-Oluwatobi<br>. Chukwunedum Isu<br>. Oluwajomiloju Fakolujo<br>.Tomek Bergier (Client) |
| Location:      | Portland square                                                                                                           |
| Meeting Goals: | .Show client working source code                                                                                          |

### **Meeting Purpose**

The purpose of this meeting was to present the client with the source code that has been developed so far for the AI-driven English learning application. The session aimed to provide a clear demonstration of the current progress, highlight key functionalities implemented by individual team members, and gather the client's feedback, expectations, and suggestions for further improvement. Additionally, the meeting served as an opportunity to ensure that the project remains aligned with the client's vision and requirements.

### **Attendance**

The meeting was attended by the client and all group members involved in the development of the application. Each member contributed by presenting their respective sections of the project and engaging in discussions with the client.

### **Meeting Outcomes**

During the meeting, the team successfully demonstrated working versions of different sections of the application, particularly the homepage and the lessons page. Each section was explained in terms of its design, functionality, and intended user experience. The client carefully reviewed the work presented and provided constructive and encouraging feedback. Overall, the client expressed satisfaction with the progress made so far and acknowledged the effort put into developing functional components of the application.

### **Discussion Highlights**

- **Homepage UI**

Chukwunedum presented a fully functional version of the homepage, outlining its layout, navigation structure, and user interface design. The homepage demonstrated a clear and user-friendly structure intended to enhance the overall user experience. The

client responded positively, commenting that the design looked professional and visually appealing. The client also appreciated the clarity of the interface and indicated that it aligns well with the expected direction of the application.

- **Lessons Page**

Nathan presented the lessons page, explaining its purpose within the application and how users would interact with it. The page showcased the structure for delivering learning content and demonstrated initial functionality. The client acknowledged that the development of this section was progressing well and stated that the work was on the right track. The feedback suggested that the current implementation meets expectations and provides a solid foundation for further enhancements.

## **Conclusion**

Overall, the meeting was highly productive and successful. The team was able to effectively present functional aspects of the application and clearly communicate their progress to the client. The feedback received was positive and constructive, providing reassurance that the project is moving in the right direction. Moving forward, the team will continue to refine the existing features and build upon the current work, taking into account the client's feedback to ensure the final product meets all expectations and requirements.
