

Ethical Considerations Report

1. Introduction

This report outlines ethical considerations associated with developing an AI-driven educational application.

2. Data Privacy

The system collects user data such as language input and progress metrics. Data must be securely stored and handled in compliance with data protection regulations.

3. Transparency and Consent

Users must be informed about AI usage and data collection, with clear consent mechanisms.

4. Bias and Fairness

AI feedback must avoid linguistic or cultural bias and support diverse language backgrounds.

5. Educational Responsibility

The system is designed to support learning and teaching rather than replace educators.

6. Conclusion

Addressing ethical considerations ensures trust, fairness, and responsible AI usage within the application.
