

Existing Solutions Analysis Report

1. Introduction

This report evaluates existing English learning platforms to identify strengths, weaknesses, and gaps addressed by the proposed application.

2. Duolingo

Strengths include accessibility and gamification. However, it offers limited academic English support and minimal explanation of errors.

3. Grammarly

Grammarly provides strong grammar correction for writing but focuses more on editing than learning and lacks speaking or adaptive learning features.

4. BBC Learning English

BBC Learning English offers high-quality educational content but lacks personalisation and interactive AI feedback.

5. Gap Analysis

Most existing solutions focus on isolated skills or static content. Few platforms integrate adaptive AI learning, real-time assistance, and teacher analytics in one system.

6. Conclusion

The proposed application addresses these gaps by combining AI-driven personalisation, interactive support, and educator-focused analytics.
