

Research Summary and Reflection Report

1. Introduction

This report summarises all research conducted for the Adaptive AI-Driven English Learning Application.

2. Summary of Findings

Research confirmed strong demand for personalised English learning supported by AI. User research highlighted the importance of real-time feedback and educator oversight.

3. Research Impact on Design

Findings directly influenced adaptive dashboards, AI assistance, and teacher analytics described in the SDD.

4. Project Feasibility

The system is technically feasible and ethically responsible, with clear educational value.

5. Conclusion

Overall research supports the development of the proposed AI-driven English learning application as a viable and effective solution.
